

Risk Assessment

Date: 14th of November

Lesson Room: Main chemistry Lab

77Reference No: F2 of the catalyst text book. CLEAPPS	YEAR: 7 Form: 1G
Experiment:	Test for hydrogen
Demo:	During the lesson
Preparation In advance:	Before the lesson, check all the material needed, and test experiment.
Items Needed: - test tube - copper sulphate - splints - sulphuric acid - zinc	Safety: - goggles - aprons or lab coats
Notes: <u>Sulphuric acid:</u> - Dangerous and very corrosive when solutions are bigger or equal to 1.5M. <u>Copper Sulphate:</u> - It is harmful if swallowed, but can be irritating.	CLEAPPS Hazard Card No: - Card No.98 - Card No. 27
