

Investigation work

Name:

Date:

Candle in a jar

1. You are going to carry out an investigation to see how different sized jars affect how long it takes for a candle to go out. You will write up the experiment as follows.
 - a) Title
 - b) Aim
 - c) Method (what I did)
 - d) Diagram
 - e) **Table of Results**
 - f) **Graph**
 - g) Conclusion
 - h) Was it a fair test?
 - i) How can I improve my experiment?

Important:

Don't forget in your conclusion to explain why you think you got the results you did.

2. Which part of the air is used in combustion (also know as burning)?
-
