# Predators and Preys

## Activity 1

Choose and draw an example of a predator and a prey...and write some of their adaptations that allow them to catch and be protected against predators.

# Predators and Preys Game

## Activity 2

Can you catch your prey?

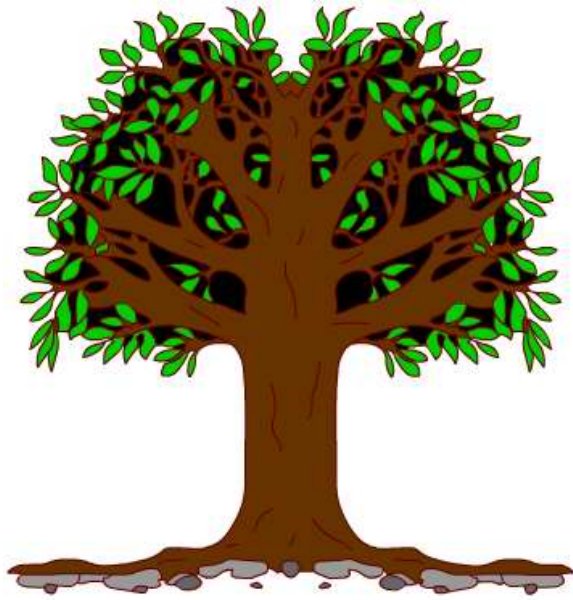

Can you be protected against your predator?

# Feeding Types...

## 1. Producers

Producers make their own food.

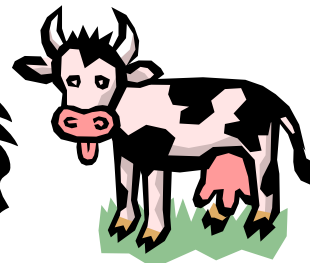

e.g. plants

## 2. Consumers

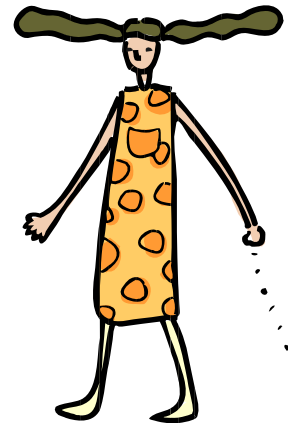

Cannot make their own food. They must consume other organisms to get the food that they need.

e.g. lions

e.g. cow

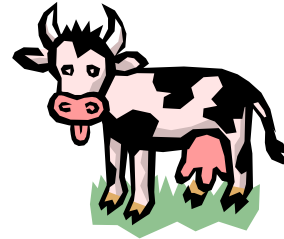

e.g. humans

## Consumers are divided in different types:

### **Herbivores**

Herbivores eat producers.  
This means plants and possibly bacteria.

### **Carnivores**

Carnivores eat other consumers.  
This means animals.

### **Omnivores**

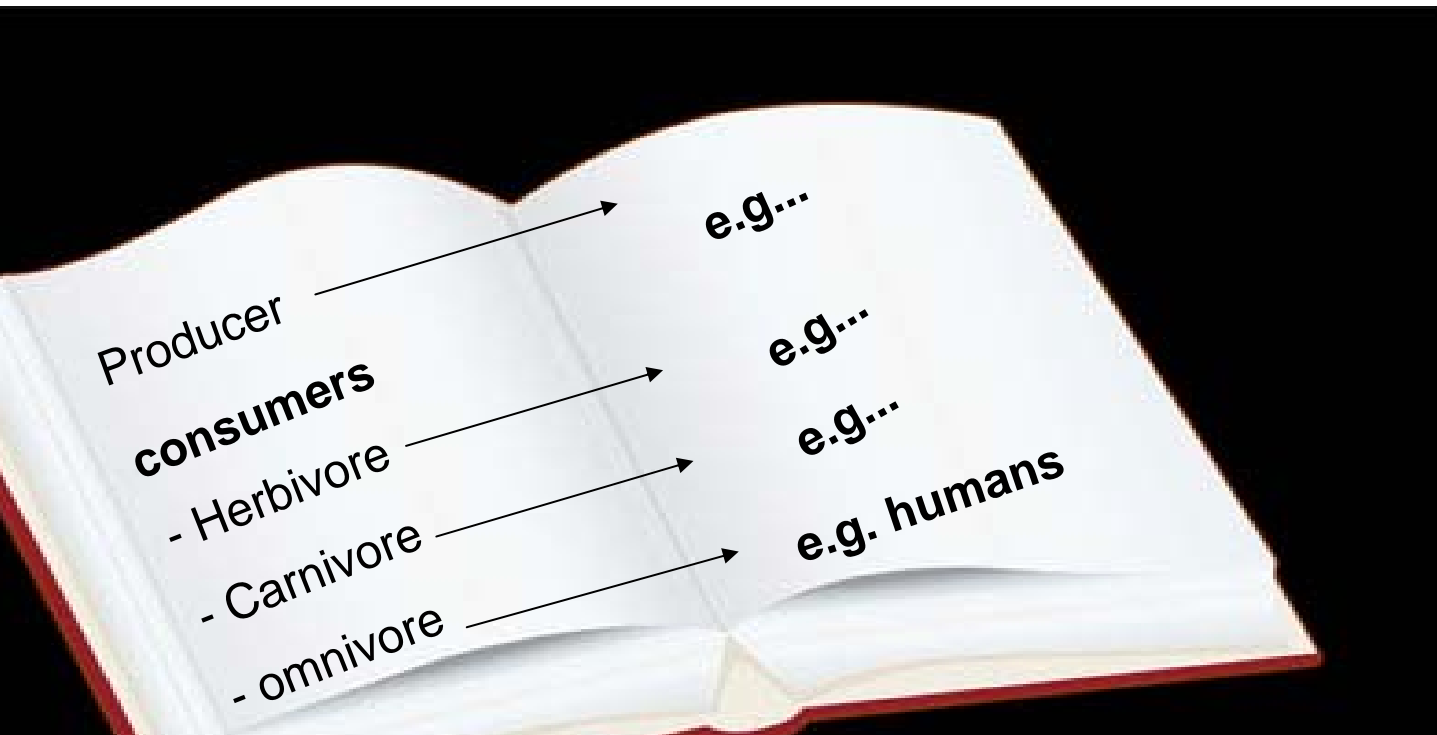

Omnivores eat other consumers

# g Types...

## Activity 3

# Matching the Correct terms...

<b>Herbivore</b>		An organism that only eats other consumers.
<b>Producer</b>		An organism that only eats producers.
<b>Consumer</b>		An organism that makes its own food.
<b>Omnivore</b>		An organism that cannot make its own food.
<b>Carnivore</b>		An organism that eats the both
