

Quando a casa é o nosso escritório

- Instead of working in the office we can work at home . There's more comfort and quiet near the fireplace.
- When our home is our office we can do a lot of thing at the some time, we can eat something when we are sending an e-mail to our clients.
- I think that when our home is our office that's boring because home a place to rest, to relax and to stay with our family , not to think of our job problems.
- Working at home is easier because we are comfortable, we don't need to wake up early to go to the office because we are already at our work place, we can spent more time with the family.
- It is good when our home is our office because we can be helped by brothers and our parents. It is good to receive people and talk about our homework. At home he can use the internet. It's comfortable and we don't have any timetable.
