Tema : When our home is our office

→ Instead of working in the office we can work at home. There's more comfort and quiet near the fireplace.

→ when our home is our office we can do a lot of things at the same time, we can eat something when we are sending an e-mail to our clients.

→ I think that when our home is our office that's boring because home is a place to rest, to relax and to stay with our family, not to think of our job problems.

→ working at home is cosier because we are comfortable and generally we don't need to wake up so early. To get the office because we are abroad at our work place, we can spend more time with the family. (?????)

→ it is good when our home is our office because we (teenagers) can be helped by brothers and our parents.

It is good to receive people and talk about our homework at home they can use our internet. It's comfortable and we don't have any timetable.
